COMPUTER PROGRAMMING & GAME DESIGN
This course explores the art and science of the game development process through hands on projects using a wide range of software. Students work in teams to design and program their own custom games in class, in both 2D and 3D environments. The course examines 3D modeling, 2D animation, level design, sound effects, player psychology, mathematics for gaming, and game logic/programming.
PATHWAY: SOFTWARE AND SYSTEMS DEVELOPMENT

GAME DESIGN AND DEVELOPMENT
This course introduces students to the analysis, design, and creation of interactive three dimensional animation and games. This is a hands-on course begins with an extensive overview of 3D graphics, the basic components of video game design; modeling, texturing, lighting, animation, and rules of game play will be addressed. Using industry software, students will complete individual and group projects that require the problem solving and practical application of course competencies to create simple games.
PATHWAY: GAME DESIGN AND INTEGRATION

ENGINEERING AND DESIGN DRAFTING
This course prepares students for a variety of careers related to the field of architecture. The student will be introduced to the field of architecture. The student will learn the techniques used in the drafting process and the use of AutoCAD LT 2013, 3D Home Architect Deluxe, Microsoft Word, Microsoft Power Point. Integrated throughout the course are academic and CTE standards, which include safety, communication, technology, workplace ethics, career planning and other employability skills. At the end of the course, students will have produced a portfolio sufficient to compete for an entry level CAD drafting position.
